

## HEPATITIS SURVEILLANCE DATA ANALYST

This position is responsible for the data analysis activities for the Louisiana Office of Public Health STD/HIV/Hepatitis Program (SHHP), in the Hepatitis Surveillance unit. Data utilized for Hepatitis Surveillance activities include Hepatitis laboratory data, Case Report Forms, Provider Report Forms, Linkage to Cure data, investigation data, Medicaid data, and data from related sources and programs. This position will implement and coordinate data analysis activities to monitor and evaluate progress toward meeting hepatitis elimination within the state. All activities must be completed in accordance with the security and confidentiality guidelines required by the Centers for Disease Control and Prevention (CDC) and SHHP. This position is eligible for remote work per Chancellor's Memorandum-73 and School of Public Health Policies.

### Qualifications

#### Required:

- Bachelor's degree in Public Health, Biostatistics, Epidemiology or related field.
- Five (5) years of relevant experience.
- Superior data management and analytical skills utilizing statistical software including SAS or SPSS; proficient in Microsoft Office Suite; strong written and verbal skills required.
- OR Master's degree with 2+ years or PhD can substitute for five years relevant experience.

#### Preferred:

- Master's degree in Public Health, Biostatistics, Epidemiology or related field.
- Five or more years of professional experience in data management and analysis. Experience with Viral Hepatitis or other infectious disease data, and local, state or federal programs. Experience with SQL, Tableau, or ArcGIS.
